VIMAL R

Software Engineer • AI/ML Developer • Backend Engineer
6381133218 • vimalg454@gmail.com • GitHub: Vimal4hckr • LeetCode : vimal_hckr

PROFESSIONAL SUMMARY

M.Tech Computer Science graduate with hands-on experience building AI-powered applications, machine learning models, and backend systems using Python, Flask, and MySQL. Experienced in database management, data modeling, and version control (Git), with a track record of collaborating across cross-functional teams using agile development practices to deliver scalable, high-performing software solutions. Skilled in NLP, data analysis, troubleshooting, and debugging complex software problems.

TECHNICAL SKILLS

Languages	Python (Advanced) • Java (Proficient) • C • SQL
Frameworks	Flask • REST API Development
Databases	MySQL • Database Management • Data Modeling • Query Optimization
ML / AI	Scikit-Learn • Pandas • NumPy • NLP • Intent Recognition • Deep Learning
Tools	Git • GitHub • Version Control • VS Code • Matplotlib
Concepts	OOP • DSA • Agile Methodology • Software Debugging • Troubleshooting • Testing
Soft Skills	Mentoring • Problem-Solving • Technical Communication • Cross-functional Collaboration
SAP Exposure	SAP UI5 Basics • SAP HANA Fundamentals

PROFESSIONAL EXPERIENCE

Technical Trainer • Institution (Computer Science Dept.) *Jan 2025 – Present*

- Delivered structured programming and CS training sessions covering Python, Java, DSA, and debugging methodologies to cohorts of students.
- Mentored students through end-to-end project development, improving their coding proficiency and reducing bug resolution time by guiding systematic debugging practices.
- Designed hands-on exercises and assessments that aligned with real-world software engineering requirements, boosting student engagement and project completion rates.

Network Support Engineer • Broadband Vision *2024 – Jan 2025*

- Configured and maintained network infrastructure ensuring high availability across the supported environment, minimizing downtime and service disruptions.
- Diagnosed and resolved 20+ hardware, software, and connectivity incidents per month, applying root-cause analysis to prevent recurrence.
- Collaborated with cross-functional teams to document network topology, streamline troubleshooting workflows, and improve issue resolution speed.

PROJECTS

AI-Powered Student Support Chatbot | *Python· Flask · MySQL · NLP · HTML/CSS/JS*

- Architected and deployed an intelligent chatbot to automate student query resolution across academics, attendance, exams, and placements — reducing manual support effort by an estimated 60%.
- Implemented NLP-based intent recognition pipeline that accurately classifies and routes 10+ query categories, improving response relevance and user satisfaction.
- Integrated a MySQL backend to retrieve real-time student data and generate dynamic, context-aware responses at scale.

Cryptocurrency Price Prediction — Machine Learning | *Python · Scikit-Learn · Pandas · NumPy · Matplotlib · MySQL*

- Built and benchmarked multiple ML regression models (Linear Regression, Random Forest, LSTM) on historical crypto market data to forecast price trends with measurable accuracy improvements.
- Performed end-to-end data pipeline: preprocessing, feature engineering, model training, hyperparameter tuning, and evaluation using MAE/RMSE metrics.
- Visualized prediction results and algorithm comparisons using Matplotlib dashboards, enabling clear interpretation of model performance for non-technical stakeholders.

EDUCATION

M.Tech — Computer Science & Engineering *CGPA: 7.8 / 10.0*
Sri Krishna College of Engineering and Technology

CERTIFICATIONS

Artificial Intelligence • Deep Learning • Cyber Security • AI Agents: Intensive Vibe Coding with Google

ACHIEVEMENTS & INTERESTS

- Solved 100+ coding problems on LeetCode (vimal_hckr), specializing in data structures, dynamic programming, and algorithm optimization — demonstrating consistent self-directed learning.
- Completed Google's AI Agents Intensive Vibe Coding Course, gaining hands-on exposure to agentic AI workflows, prompt engineering, and multi-step task automation with LLMs.
- Interests: Open-source contribution, AI/ML research, backend system design, and building developer tools that improve engineering productivity.
